Education

LAHORE GARRISON UNIVERSITY

Bachelors of Software Engineering (3.51 CGPA)

Lahore, Pakistan

2021 - 2025

GOVT. ISLAMIA COLLEGE CIVIL LINES

Pre-Engineering (HSSCE)

Lahore, Pakistan

2018 - 2020

Professional Experience

CANCER CARE EMR SYSTEM

Software Engineer (ROR Dev) at Xprolabs

Lahore, Pakistan

Oct 2025 - Current

Cancer Care Electronic Medical Record (EMR) system development

- Developed a cancer care EMR system using Rails 8 with key gems like devise, paper trail, bullet, turbo stream, ransack, kaminari, cacoen, sidekiq and others.
 - Working on background jobs
 - Implemented role-based logins with invite-only access and allowed for admin management of users, doctors, and patients.
 - Designed functionality for managers to manage doctors and patients, including the creation and exception management of doctor slots.
 - Enabled doctors to manage their own slots, appointments, scan image uploads, and status changes, with integrated email notifications.
 - Integrated PostgreSQL and Active Record image processing for patient data and document handling.
- Worked with Git for version control, including:**
- **Branch management:** Created and managed feature branches, merged changes, and handled conflicts during pull requests.
 - **Commit management:** Wrote clear and meaningful commit messages for changes and updates.
 - **Git stash:** Used git stash to temporarily save changes when switching between tasks or branches.
 - **Collaboration:** Collaborated with team members via GitHub, performing regular git pull and git push operations to keep codebase synchronized.
 - **Code review and conflict resolution:** Assisted in resolving merge conflicts during pull request reviews.

Backend-Focused Project | Ruby on Rails | MiniJob Restful APIs

- Developed a production-like **Job Management REST API using Ruby on Rails (API mode)** and PostgreSQL, supporting job listing CRUD operations and candidate interactions.
- Implemented secure **JWT** authentication with Devise and role-based authorization using Pundit.
- Built advanced job search and indexing using Elasticsearch and Searchkick, with API pagination through Kaminari.
- Designed structured and consistent API responses using **JSONAPI Serializer** and documented REST endpoints using Swagger.
- Implemented **Sidekiq background jobs** for weekly candidate digest emails, Elasticsearch re-indexing, and automated processing of expired job postings.
- Added recurring task scheduling using Whenever and implemented API rate limiting and security using **Rack::Attack**.
- Developed job activity analytics and insights using Chartkick.
- Applied production-oriented backend practices including authentication, authorization, asynchronous processing, search optimization, API security, scheduling, and maintainable REST API architecture.

TECHANZY LIMITED

AI & Custom Software Solutions Experts

Software Developer Intern

Lahore, Pakistan

January 2025 - April 2025

- Gained hands-on experience in the software development lifecycle by working with Django, enhanced 30% performance of real-world projects.
- Worked on **Agentic AI-based call analysis** system using the Django framework.
Automated call upload processes by building **Python scripts** with the assistance of AI tools and prompt engineering.
- Enhanced system functionality by implementing dynamic **field filters for improved data handling**.

-
- Strengthened **problem-solving** skills by tackling complex development challenges.
 - Gained foundational knowledge of **Vapi and Make.com** for **API integrations and workflow automation**.

AMAL ACADEMY

Lahore, Pakistan

Education startup funded by Stanford University that teaches professional skills to students and corporations

Career-Prep Fellow

December 2024 - March 2025

- *Communication:* Completed a **competitive** written application and interview process to be selected from over **4,500 applicants** for intensive 3-month Fellowship funded by **Stanford University**.
- *Skills development:* Invested **150 hours** to develop business skills including communication, leadership, **problem solving**, and **teamwork** that helped me make a deeper impact on the job.

HEADSTARTER AI

Lahore, Pakistan

International Software Engineering Fellowship focused on career development in AI.

Software Engineering Fellow

July 2023 - October 2024

-*Artificial intelligence software:* Developed **AI-based websites** for weekly projects and deployed 2 for hackathons, boosting my profile by 30% and providing valuable hands-on experience.

-*Problem solving:* Cleared **interviews** by demonstrating technical and soft skills, including solving 4 **coding problems** during the process.

Academic Experience

GYM-FU FRONT-END PROJECT

Lahore, Pakistan

Fitness Website for personalized workout plans and expert advice at UET.

Developer & Project Lead

July 2023 - September 2024

NEXTBOT AI PROJECT

Lahore, Pakistan

AI project focused on enhancing user interaction through intelligent chat-bot. Headstarter AI Internship

Developer & Project lead

July 2023 - September 2024

Extracurricular & Volunteer Experience

Team Management Head Web-3.0 Society- LGU

Lahore, Pakistan

- Maintained organized workflow, organized workshops and managed events efficiently.

Honors and Awards

ACADEMIC Certificates

- Received certificate of Merit- High Achiever Award twice - LGU 2023 – 2024
- Received certificate of MERN full stack development- UET 2023 – 2023

WORKSHOPS

- Capacity Building Training - Arfa Karim 2024 – 2024

Additional

-
- *Technical Skills:* Frontend Development, AI tools, Microsoft office, Task management, UML diagrams.
 - *Interests:* E-games, Tech videos, Exploring AI, Cyber security and Computer networking.
